

Course Directive

IN720 Virtualisation

Semester Two, 2015

Description

It has become the norm in IT operations to use virtual systems in a wide range of applications. The original intention of this was to make efficient use of resources and this is still important. However, we have also come to realise that virtual systems enable new kinds of deployment and operational practices that are changing the industry.

In this paper we will learn about how to provide and consume virtual systems.

Course Information

- 15 Credits
- Prerequisite: IN719

Lecturer

Tom Clark
Office: D311
Phone 470 4356
Email: tom.clark@op.ac.nz

Course Dates

Term 1 (10 weeks)	20 July - 25 September
Mid semester break	26 September - 11 October
Term 2 (6 weeks)	12 October - 20 November

Resources

We will use a couple of books for reference during the semester and it is strongly recommended that you get your own copies. The first one we will use is *The Docker Book* by James Turnbull, available at <http://www.thedockerbook.com>.

An OpenStack reference will be selected later in the semester.

You will need to set up accounts on a few online services like GitHub, Docker Hub, and AWS. We will deal with these as they come up in class.

Lab documents, slides, and other material is available on Github at <https://github.com/tclark/op-papers>.

Course Content and Schedule

This schedule is subject to change based on needs of the class.

Week	Week Start	Topics
1	20 Jul	Introduction, Containers
2	27 Jul	Docker
3	3 Aug	Docker Images
4	10 Aug	Docker Registries, Docker Hub
5	17 Aug	Container Orchestration
6	24 Aug	Container Orchestration
7	31 Aug	Work Time
8	7 Sep	Hosted Clouds
9	14 Sep	AWS
10	21 Sep	AWS
H1	28 Sep	Holiday
H2	5 Oct	Holiday
11	12 Oct	OpenStack
12	19 Oct	OpenStack
13	26 Oct	OpenStack
14	2 Nov	Work Time
15	9 Nov	Work Time
16	16 Nov	Revision and Exam

Assessment

Assessments are weighted as follows:

Assessment	Weighting
Container Project	25%
AWS Project	20%
OpenStack Project	25%
Theory Exam	30%

Criteria for Passing

You must receive an overall average mark of 50% or higher to pass this paper.

Course Requirements and Expectations

Attendance

This paper is composed of a mix of lectures and self-paced project work. Attendance is at your discretion. However, you are responsible for keeping up with events that take place in class and completing work on schedule.

Communication

Important announcements and discussions about the course, assessments, and scheduling may take place during class sessions. It is your responsibility to be informed about them. If you cannot attend a class session, be sure to check with another student.

A private channel, **virtualisation**, is set up on the op-bit Slack at <https://op-bit.slack.com/>. The channel is intended for general class discussion. Important announcements may also be posted there, so you should join and monitor the channel.

Your student email is an official communication channel. It is your responsibility to regularly check your student email for important course related material, including changes to class scheduling or assessment details. Not checking will not be accepted as an excuse.

You can manage your email at the Student Hub and download the instructions for forwarding your email at <http://www.op.ac.nz/students/student-hub/>

Proprietary software

Most of this class can be completed using free/open source software, but some labs may require the use of proprietary software. In addition, lab machines use proprietary operating systems and applications.

Polytechnic Closure

In the event that the Polytechnic is closed or has a delayed opening because of snow or bad weather, you should not attempt to attend class if it is unsafe to do so. It is possible that your instructor will not be able to attend either, so classes will not physically be meeting. However, this does not become a holiday. Rather, material will be available on the Cisco Academy web site covering the material for classes affected by the closure. You are responsible for any material presented in this manner. Information about closure will be posted on the Otago Polytechnic facebook page <https://www.facebook.com/OtagoPoly>.

Group Work and Originality

Students in the Bachelor of Information Technology degree are expected to hand in original work. Students are encouraged to discuss assignments with their fellow students. However, all assignments are to be completed as individual works unless group work is explicitly involved. Failure to submit your own unique work will be treated as plagiarism.

Referencing

Appropriate referencing is required for all work. Referencing standards will be specified by your instructor.

Plagiarism

Plagiarism is submitting someone else's work as your own. Plagiarism offences are taken seriously and an assessment that has been plagiarised may be awarded a zero mark. A definition of plagiarism is in the Student Handbook, available online or at the school office.

Submission Requirements

All assignments are to be submitted by the time, date, and method given when the assignment is issued.

Extensions

Extensions are only available for unusual circumstances. These must be applied for, and approved, prior to the submission deadline.

Impairment

In case of sickness contact your lecturer or year co-ordinator as soon as possible, preferably before the test or assignment is due. The policy regarding the granting of a mark that considers impaired performance requires a medical certificate and a medical practitioners signature on a form. You may should refer to the guide on impaired performance on the student handbook.

Appeals

If you are concerned about any aspect of your assessment, please approach the lecturer in the first instance. We support an open door policy and aim to resolve issues promptly. Further support is available from the Programme Manager and Head of School. Otago Polytechnic has a formal process for academic appeals if necessary.

Other Documents

Regulatory documents relating this course can be found on the Polytechnic website.

Special Resources and Requirements

If you have any special needs, whether they relate to the course material, the exercises, the assessment, or anything in the course - then *please* let your instructor know as soon as possible.
